INMOLD

Inmold combines affordable tailor-made design with the individual requirements of the customer to deliver the IML system that meets highest demanding expectations. Designed, engineered and assembled in Serbia, defined by function and forged from an experience and love for packaging, our IML robots are made to perform. Our customers receive the best automation solution for their packaging project, at a second to none price-performance ratio.

OUR TYPICAL PRODUCTS:

- Buckets with or without handles (up to 30l)
- All types of lids
- Containers in all shapes
- Flower pots
- Drinking glasses
- Tubes

SERVICES WE OFFER:

- Complex IML system repairs
- Complete IML system overhauls
- Regular and emergency servicing
- Production of spare parts
- Operation optimization
- Replacement of dummies

THE ADVANTAGES OF OUR IML SYSTEMS:

- Each IML system is manufactured at Inmold
- Surface protection of all mechanical parts
- Fully adapted to the customer's needs
- Exceptional support following sales
- Use of standard parts
- Extreme manufacturing precision
- Innovation in design
- Robust construction
- Efficient coatings

In case of need for mould servicing, INMOLD is there for you, regardless of whether it is a mould that we manufactured or made by another tool shop. Mould analysis may be performed at the customer's or at INMOLD's premises.

The essence of any plastic injection molding process is the mould. In order for production to run smoothly, to progress and create values for the owner, quality, experience, expertise and innovation must be built into the mould.

Goran Jankovic, proprietor
